Experience

Oct 2020 - Current Belgrade, Serbia

Senior Front-end Developer
Alterset doo

I'm working in a distributed team, enhancing the codebase, doing code review and coordinating the FE implementation of APIs. I actively collaborate with FE and BE developers to enhance functionality and usability. Additionally, I contribute to the creation of technical documentation, oversee the release process, and ensure successful deployment of projects, accompanied by comprehensive release documentation.

Oct 2020 - Oct 2023 Munich, Germany

Senior Front-end Developer
Limehome GmbH

I proposed technical solutions, conducted research, and developed new features. I performed code reviews, improved the codebase, and coordinated API implementation. Collaborating with UI/UX designers, I enhanced functionality and usability. Additionally, I wrote technical documentation, managed the release process, and successfully released projects, providing detailed release documentation.

Feb 2019 - Sept 2020 Leskovac, Serbia

Lead Software Developer
dCloud doo

As the head of the front-end division, I led collaborative efforts with both front-end and back-end developers across various projects, streamlining workflow processes for optimal efficiency. Additionally, I provided mentorship to developers and conducted thorough code reviews to ensure quality standards were met.

Feb 2012 - Jan 2019 Aliso Viejo, California

Tech Lead
Meltdown Challenge LLC

Throughout this period I assumed a multifaceted role in development, involving high-level decision-making, stakeholder communication, and team management. I oversaw all aspects of development, including managing the front-end development team, providing mentorship, and contributing to product and concept design.

Jan 2011 - Jan 2012 Aliso Viejo, California

Front-end Developer
Honest Florist LLC

In my role, I spearheaded web design and front-end development while collaborating closely with back-end developers and stakeholders to develop new features and maintain the online flower shop platform. Additionally, I took charge of concept design and website maintenance, ensuring adherence to standards for user interfaces, page design, and overall optimal user experience.

Jan 2007 - Jul 2013 Leskovac, Serbia

Web Developer / Web Designer
Ceesco.net

This is where my journey into web development started. I immersed myself in diverse projects, mastering various technologies along the way. Direct client communication became part of my daily routine as I defined project scopes, crafted website content, and developed designs. Additionally, I managed site administration, maintenance, and provided support throughout projects life-cycle.
